

**For Release:** April 9<sup>th</sup>, 2010

**iMediaTouch Radio Automation system from OMT Technologies now provides full compatibility with the E Series Wheatstone IP System**

**Winnipeg, Manitoba – OMT Inc. (TSXV: OMT):** OMT Technologies is pleased to announce our latest version of iMediatouch On Air and iMediaLogger now provide a new powerful level of control using the Wheatstone WheatNet-IP systems.

With this IP/network communication between iMediaTouch and Wheatnet-IP, OMT clients can now control routing and GPIO functionality from within the iMediatouch On Air and iMediaLogger application user interfaces. These new interfaces complement our existing support for the Wheatstone Audio-Over-IP WDM driver.

“For iMediaTouch clients who also employ Wheatstone in their studios for their analog to digital studio conversions, iMediaTouch’s new Wheatstone interface capability is a true client benefit.” stated Jackie Tetlock, Marketing and Sales Manager. “The interface reduces the need to purchase automation system peripherals such as closure devices, audio cards and switchers eliminating traditional studio wiring with multi-pair, and greatly reduces infrastructure costs for new or conversion studio projects.”

“We are very excited about this new interface, which gives Wheatstone clients using iMediatouch for content delivery maximum control of the Wheatnet-IP Audio system,” stated Kelly Parker, Wheatnet-IP Product Manager. “This seamless interface of the two products simplifies everything from wiring, to automated programming and live assist, all over single CAT5e\6 cabling already in place, saving both time and money.”

OMT and Wheatstone will be demonstrating iMediaTouch and the NAB pre-release of the Wheatstone interface along with other products at the NAB Show, April 12-15 in Las Vegas. Demonstrations of the Wheatstone E Series IP Interface can be seen at the OMT booth #C1054 or the Wheatstone booth #C2623.

**About Wheatstone**

Located in New Bern, North Carolina, USA, Wheatstone Corporation designs and manufactures professional broadcast audio equipment under the WHEATSTONE, AUDIOARTS ENGINEERING, and VORSIS brand names. Products include digital audio consoles and control surfaces, analog audio consoles, networked digital audio systems, audio-over-IP, signal processing for on-air and studio applications, pre-wiring, and software.

**About OMT and iMediaTouch**

OMT Inc. (OMT) is a technology solutions provider to the broadcast and media industries across North America and Internationally. iMediaTouch is OMT’s flagship product suite of audio content management and digital delivery software for commercial and non-commercial broadcast radio applications. OMT’s iMediaTouch Radio Automation software and radio’s #1 selling digital logger, iMediaLogger, are installed worldwide in individual stations, station groups and some of the largest broadcast and audio delivery services to distribute audio content heard by millions of people worldwide through television, radio, satellite, cable and internet broadcasts.
